Clinical rationale

NCCN Category 1 evidence: Trastuzumab is preferred for HER2-positive invasive breast cancer in the adjuvant setting (NCCN BINV-N). Patient meets all Aetna 0048 §III medical-necessity criteria: HER2 IHC 3+ confirmed by FISH amplification, Stage IIIA pathologically confirmed, LVEF 62% within the 60-day cardiac assessment window, ECOG 1, no prior anthracycline contraindication.
